

March 19, 2015

Dear SOF Community,

The school was approached in January by a real estate developer that has acquired the buildings next to the school for the construction of new residential buildings. Obviously, we are concerned about the impact of this construction and are taking strategic action in light of this news.

We have created a task force of committed parents who have experience with construction, architecture, engineering, sound and air quality monitoring, and NYC political and/or Department of Education connections. If anyone in the community also has any of these expertises and would be interested in joining our task force, please feel free to reach out to us. In addition, the school has retained an attorney who is expert in land use issues to represent the interests of the school.

We will be updating the community at PA meetings and through ebuletins about the developments of the proposed project and the actions of our task force.

As always, we appreciate the support and dedication of our SOF families who help make our school so wonderful!

Sincerely,

Stacy and John
